Website QA Review: Home Page

Reviewed: Aug 5, 2026 | **Reviewer:** Aparna | **Source of Truth:**

TBG_Website_Content_Architecture doc

Live URL: <https://tbz-web.vercel.app/>

Status: Draft for Aparna's review → then share with Paige - Niharika

Summary

Severity	Count
🔴 Critical (blocks launch)	4
🟡 Important (fix before Paige review)	4
🟢 Minor (polish)	2

Overall finding: The page structure (section order, scroll layout, three-path cards, principles, closing CTA) is correct. The content filling those sections is almost entirely wrong. The developer appears to have used AI-generated placeholder copy instead of pulling from the spec doc. The entire page needs a content pass using spec copy verbatim.

🔴 Critical Issues

1. Hero Section: Headline & Subhead Off-Spec

What's live:

"Human-Centered AI Transformation"

"Guiding leaders and organizations through a proven capability evolution from awareness to sustainable enterprise impact."

What it should be:

Headline

Option C: "Stop Implementing AI Tools. Start Architecting Human Performance" **or** Begin Building Human Performance with AI **or** Start Architecting Human Performance with AI.

At TBG we create the AI Systems that Empower Human Performance and assist in Strategic upskilling and reskilling the workforce

2. "Meet Columbus" Section Entirely Missing

What's live: Nothing. Page jumps straight from Hero to Carousel. And, it is just placed in the corner bottom. It was asked to be placed like a SCROLLING WIDGET.

What should be here:

Columbus is our AI assistant. It'll ask a few questions about what you're looking for, and our team follows up personally. No bots deciding anything, no automated sales pitch. Full details on how it works are one click away.

What's Moving? TBG & Industry Updates.

This UI and the below UI(3 Paths Section) are almost the same. It is good we bring some difference to improve relatability/identity and engagement.

What's live (WRONG):

- "Tailored Strategic Engagement" header
- Card 1: "For You" listing "Custom Agent Workflow Suite", "Personal Productivity Blueprint"
- Card 2: "For Leaders" listing "Departmental Readiness Audit", "Leadership Upskilling Cohorts"
- Card 3: "For Organizations" listing "Proprietary ROI Dashboard", "Full-Stack Agent Deployment"
- Audience labels: "VPs, Department Heads & Directors" / "CXOs & Enterprise PMOs"

These products do not exist at TBG. This is a credibility risk if seen externally.

Replace with:

Section headline:

Already Know What You Need? Explore Directly.

Card 1 (larger, primary):

For you: Build Your Own AI Fluency

A structured program for individual professionals. Practical skills, real frameworks, built for sustainable professional leverage.

CTA: Explore AI Fluency Cohort →

Card 2:

For Leaders: A Strategic Partner for Executives

A private, one-on-one engagement for leaders who need to build an AI strategy they can execute with confidence.

CTA: Learn About The Solomon Engine → Talk to Solomon AI

Card 3:

Bring AI Fluency to Your Team

Training, learning architecture, and community workshops built for organizations who want to roll out AI at scale.

CTA: Explore Organizational Partnerships → Contact Us

Remove all audience labels ("VPs, Department Heads", "CXOs & Enterprise PMOs"). Remove all "Ask Columbus" CTAs from cards.

Important Issues

5. "How It's Different" Section: Close but Rewritten

Our Executive Operating Principles

Frameworks, not tutorials

We don't teach tool shortcuts. We deliver repeatable strategic mental models and decision trees.

[See the frameworks → →](#)
links to Resources

People, not the tech stack

Technology fails without cultural readiness. We design human workflows that elevate your team.

[Learning Architecture Design → →](#)
links to Learning Architecture Design

Proven, not promised

Rigorous measurement, verifiable performance benchmarks, and measurable business impact.

[See Our ROI → →](#)
links to Our ROI for Human-Focused AI

What's live:

"Our Executive Operating Principles"

"Frameworks, not tutorials: We don't teach tool shortcuts. We deliver repeatable strategic mental models and decision trees."

"People, not the tech stack: Technology fails without cultural readiness. We design human workflows that elevate your team."

"Proven, not promised: Rigorous measurement, verifiable performance benchmarks, and measurable business impact."

Replace with:

Built on structure, not screenshots.

We explore how to think with AI, not which buttons to click.

CTA- TBD

People-first.

Every learning journey starts with how people actually learn and adopt new skills.

Not just the tools themselves.

CTA-TBD

Proven, not promised.

Every framework we use has been vetted and tested with real clients.

CTA- See our ROI (Can be routed to ROI Page)

Remove "Our Executive Operating Principles" title. Either no title or something lighter.

6. Closing CTA Section: Too Corporate

[SCREENSHOT: Bottom CTA section]

What's live:

"Schedule a confidential 30-minute strategic consultation with our executive team."

"Confidential 30-minute strategic consultation with our senior executive team."

Replace with:

Not Sure Which Path Is Right for You?

Talk it through with us directly.

CTA: Book a Discovery Call →

Link to: Google Calendar booking (Discovery & Alignment Call, \$50 credited)

7. Columbus Widget Mislabeled

[SCREENSHOT: Columbus widget in corner]

What's live: "Columbus AI / EXECUTIVE ADVISOR / Talk to Assistant"

Replace with:

- Label: "Columbus" (just the name)
 - CTA: "Chat with Columbus" or "Start here"
 - Remove "EXECUTIVE ADVISOR" entirely. Columbus is a friendly qualifier/router, not a decision-maker. The whole point is Paige reviews everything personally.
-

8. Audience Labels Don't Match TBG Language

What's live: "VPs, Department Heads & Directors" / "CXOs & Enterprise PMOs"

Action: Remove entirely. TBG doesn't use corporate title soup. The content architecture refers to "individual track", "executive track", and "org-buyer track" but these aren't meant to be rendered as audience labels on the page.

Minor Issues

9. Carousel Uses Fake Announcements

Content to be replaced.

10. "See All Updates →" CTA Destination Undefined

Where: End of carousel section

Issue: Likely links nowhere. Should route to the Insights page once live. Low priority for now but needs a routing decision before launch.

Designer & Dev Instructions (for Shashank)

1. Do NOT use AI-generated placeholder copy. Pull all text directly from the content architecture doc.
2. Each section's exact copy is provided above. Use it verbatim.
3. Where ⚠ appears, leave that section as an obvious placeholder until Paige decides.
4. Columbus widget: simplify label and CTA per notes above.
5. Remove all fabricated product names and audience labels.

Home Page QA Feedback

Page: dev.thebradburygroup.net (Home)

Reviewer: Aparna Mopuru (Operations Manager)

Date: September 15, 2026

Source: Screen recording walkthrough + Content Architecture doc cross-reference

Priority: Fix before designer/Paige review

Video recording

<https://app.clickup.com/90131418838/hubs/clips/4ac3c067-bc43-46d9-a282-97866db05f18.webm>

● **CRITICAL** Issue 1: Logo Not Rendering

Section: Global Nav (all pages)

Screenshot Reference:

Hero section — top-left shows broken image icon where TBG logo should appear

What's wrong: The logo image is broken. Only a tiny placeholder icon appears in the top-left corner of the navigation bar. This is visible across every page (Home, About, etc.).

Fix: Replace with the correct TBG logo asset. Ensure the image path is correct and the file is deployed to the server.

🟡 **IMPORTANT** Issue 2: Remove "Talk to Columbus in the corner" Subhead

Section: Hero

Screenshot Reference:

Hero section — subhead text below the main headline reads "Talk to Columbus in the corner..."

What's wrong: The subhead reads: "Talk to Columbus in the corner — tell us what you're working through, and our team will follow up personally." Since the Columbus AI widget is already persistently visible in the bottom-right corner of every page, this line is redundant.

Fix: Remove this subhead text entirely. The Columbus widget in the bottom-right corner is self-explanatory.

🟡 **IMPORTANT** Issue 3: Hero Headline Text Sizing / Orphan Lines

Section: Hero

Screenshot Reference:

Hero headline — "Performance." sits orphaned on its own line

What's wrong: The hero headline "Stop Implementing AI Tools. Start Architecting Human Performance." is too large, causing the word "Performance." to break onto its own orphan line.

Fix: Reduce the headline font size so the text fits cleanly onto 2 lines without orphaned words. Test at standard desktop viewport (1440px).

● **CRITICAL** Issue 4: Remove Numbering from "Meet Columbus" Section

Section: Meet Columbus (Section 2)

Screenshot Reference:

Meet Columbus section — heading shows "2. MEET COLUMBUS" with a number prefix

What's wrong: The section displays "2." before "MEET COLUMBUS." No other sections on the site use numbering, so this is inconsistent.

Fix: Remove the "2." prefix. Display as just "MEET COLUMBUS" (styled heading without numbering).

● **CRITICAL** Issue 5: "Latest Updates & Industry Briefs" Carousel — Wrong Widget Format

Section: What's Moving Carousel

Screenshot Reference:

Carousel section — small text-only cards: "Upcoming Cohort," "Industry Report," "TBG News"

What's wrong: The current carousel uses tiny text-only cards with small icons. This format cannot accommodate the imagery and rich content that will be placed here. The cards are too small and lack visual impact. Niharika has been given this feedback multiple times.

Fix: Redesign as larger box-style cards. Each item = one full-width box with space for: image/visual, title, brief description, and a CTA button ("Click here," "Register here," etc.). Place the left/right arrows beside the card area, not as dots below. Build the template now; content will be populated closer to launch.

🟡 **IMPORTANT** Issue 6: Remove Unapproved Audience Tags from Three Paths Cards

Section: Three Paths ("Already Know What You Need? Explore Directly.")

Screenshot Reference:

Three Paths section — cards display audience-segment tag badges not in the spec

What's wrong: The cards display audience-segment tags that are NOT from the Content Architecture doc: Card 1 shows "PRIMARY," Card 2 shows "VPS, DEPARTMENT HEADS & DIRECTORS," Card 3 shows "CXOs & ENTERPRISE PMOs." None of these labels exist in the approved spec.

Fix: Remove all audience-segment tag badges from the three cards. Keep only the card titles, body copy, and CTA buttons as specified in the Content Architecture document.

● **CRITICAL** Issue 7: Verify Hyperlinks on Three Paths CTAs

Section: Three Paths

Screenshot Reference:

Three Paths CTA buttons — need link verification

What's wrong: The CTA link destinations need to be verified. "Explore AI Fluency Cohort" must go to /for-you. "Learn About The Solomon Engine" must go to /for-leaders. "Explore Organizational Partnerships" must go to /for-organizations.

Fix: Confirm each CTA links to the correct internal page. Test all three buttons end-to-end.

These linking can happen only after the pages are hosted so that page actually has a web hyperlink for connection.

🟡 **IMPORTANT** Issue 8: Check Spacing Consistency

Section: How It's Different

Screenshot Reference:

Spacing between sections — verify consistency

What's wrong: The vertical spacing between "How It's Different" and the preceding Three Paths section should match the spacing used between all other sections on the page.

Fix: Audit vertical margins for consistency across all sections on the home page.

🟡 **IMPORTANT** Issue 9: Closing CTA — Confirm With Paige Before Launch

Section: Closing CTA ("Not sure which path is right for you?")

Screenshot Reference:

Closing CTA section — dark teal banner with "BOOK A DISCOVERY CALL" button

What's wrong: This section needs Paige's confirmation before keeping. The spec includes it (Section 7: Closing CTA) with the same headline, but final approval is pending.

Fix: Keep as-is for now. Flag for Paige's explicit approval before launch. Verify "Book a Discovery Call" button links to the correct Google Calendar scheduling URL from the spec.

● **CRITICAL** Issue 10: Footer Content Is NOT From the Spec — Likely AI-Generated

Section: Footer

Screenshot Reference:

Footer — shows Resources, Programs, and Connect columns with unapproved content

What's wrong: The footer contains content that does NOT exist anywhere in the Content Architecture document. Resources column (FAQ, Cohort Syllabus, Executive Briefs, Governance Guides), Programs column (AI Fluency Cohort, The Solomon Engine, For Organizations, Advisory Services), and Connect column (generic description) are all unapproved. This appears to be AI-generated placeholder content.

Fix: Remove all current footer content. Replace with a minimal footer using only confirmed navigation links (Home, About, Contact, plus actual nav items) until Paige approves footer content. Do NOT ship AI-generated content that hasn't been reviewed.

🟡 **IMPORTANT** Issue 11: Nav Dropdown Shows Dev Labels ([Same Page], [Download])

Section: Global Nav — For You dropdown

Screenshot Reference:

For You dropdown — shows [Same Page] and [Download] internal dev labels visible to users

What's wrong: The dropdown for "For You" shows internal development labels: [Same Page] next to Phase 1 and Phase 2, and [Download] next to Manager Recommendation Letter. These are developer references, not user-facing content.

Fix: Remove all [Same Page] and [Download] badge labels from the navigation dropdowns. The menu items themselves are fine — just strip the internal tags.

🟡 **IMPORTANT** Issue 12: Nav Submenus — Decide Whether to Keep or Remove

Section: Global Nav — dropdown behavior on all items

Screenshot Reference:

For Leaders dropdown — shows Enterprise Tier, Small Business Tier, Tax & Reimbursement, Apply/Interview, Walter

What's wrong: Hovering on nav items shows dropdown submenus with same-page anchor links. These may confuse visitors since they are sections within a single page, not separate pages.

Fix: Decision needed: Either (a) keep the dropdowns with cleaned-up labels and working scroll-to-anchor behavior, or (b) remove dropdowns entirely and let users discover sections by scrolling. Make a decision and implement consistently across all nav items.

Sai Aparna Mopuru Related to Nav menu I will update one universal size. For now have removed the menus from the page. Check the Revised Home of which provided you the webp page. Rest will be sharing soon.

Summary

Severity	Count	Issue Numbers
● Critical	5	#1 Logo, #4 Numbering, #5 Carousel, #7 Hyperlinks, #10 Footer
● Important	7	#2 Columbus subhead, #3 Text sizing, #6 Audience tags, #8 Spacing, #9 Closing CTA, #11 Nav labels, #12 Nav dropdowns

Next Steps

1. Fix all  Critical items first (logo, numbering, carousel redesign, hyperlink verification, footer removal).
2. Flag Closing CTA and footer for Paige's review.
3. Carousel box template can be built now; content will be provided before launch.
4. Strip all internal dev labels from nav dropdowns before any external review.

About

About Page QA Feedback

Page: dev.thebradburygroup.net/about

Reviewer: Aparna Mopuru (Operations Manager)

Date: September 15, 2026

Source: Screen recording walkthrough + Content Architecture doc cross-reference

Spec Section Order: Paige's Story → Advisory Board → Partner Spotlight → Testimonials → Team

Priority: Fix before designer/Paige review

OWNERSHIP LEGEND

 Niharika (Dev/Design fix)

 Paige (Content needed)

  Both (Dev fix + content from Paige)

Video Recording:

<https://app.clickup.com/90131418838/hubs/clips/e87be185-7949-4922-b7a7-23ea44a21c57.webm>

CRITICAL Issue 1: Section Order Does Not Match the Spec

Owner:  Niharika

Section: Full page / Nav dropdown

Screenshot Reference:

About page nav dropdown showing section order: Our Team appears before other sections

What's wrong: The Content Architecture spec defines a clear section order: (1) Paige's Story, (2) Advisory Board, (3) Partner Spotlight, (4) Testimonials, (5) Team. The current page and the nav dropdown have sections out of order. "Our Team" appears too early, and the overall page flow does not follow the approved architecture.

Fix: Reorder all sections on the About page to match the spec exactly: Paige's Story first, then Advisory Board, then Partner Spotlight, then Testimonials, then Team last. Update the nav dropdown to reflect this order.

🔧 **Instruction for Niharika:** Restructure the About page sections and the About nav dropdown to follow this exact order: (1) Paige's Story, (2) Advisory Board, (3) Partner Spotlight, (4) Testimonials, (5) Team. Team must come last.

🔴 **CRITICAL** Issue 2: Intro Section Content Is Not From the Spec

Owner: 🛠️ Niharika

Section: Top of About page (above Paige's Story)

Screenshot Reference:

About page top: shows "Learning starts with..." headline and Condition 01/02/03 cards (Psychological Safety, Learning Architecture, Workforce Readiness) that are not in the Content Architecture doc

What's wrong: The About page currently opens with a section containing a hero-style headline ("Learning starts with...") and three "Condition" cards (Psychological Safety, Learning Architecture, Workforce Readiness). None of this content exists in the Content Architecture document. The spec says the About page starts directly with Paige's Story.

Fix: This section is not in the spec and should be removed from the About page. However, do not discard the design work. Duplicate/save it as a reusable component. Aparna suggests it could potentially be repurposed for the footer. Paige to confirm.

 **Instruction for Niharika:** Remove the Condition 01/02/03 cards and the "Learning starts with..." intro section from the About page. Save/duplicate the design as a reusable component for potential footer use. The About page should begin with Paige's Story section.

 **From Paige:** Please confirm: Can the current About page intro design (the three Condition cards: Psychological Safety, Learning Architecture, Workforce Readiness) be repurposed for the footer area? Or should it be discarded entirely?

CRITICAL Issue 3: Paige's Photograph Needs to Be Updated

Owner:   Both

Section: Paige's Story section

Screenshot Reference:

Paige's Story section showing current photograph placement

What's wrong: Paige's photograph on the About page has not been updated. New professional photographs were discussed and shared previously, but the current placeholder/old photo is still displayed. The spec calls for Paige's photograph here.

Fix: Replace the current photo with the updated professional photographs that were shared previously.

🔧 **Instruction for Niharika:** Replace the current Paige photograph with the new professional photos that were previously shared with you. If you don't have them, ask Aparna for the updated image files.

🟡 **IMPORTANT** Issue 4: Partner Logos Missing / Poor Readability

Owner: 🔧 Niharika

Section: Partner Spotlight section

Screenshot Reference:

Partner Spotlight section showing numbered partner entries (01, 02) with placeholder text and no logos

What's wrong: The Partner Spotlight section has numbered entries (01, 02, etc.) but partner logos are missing. The text content is not readable, and the accessibility is poor. The design currently shows placeholder content without actual partner branding.

Fix: Source actual partner logos from their websites and place them. Aparna previously provided at least one logo. For the remaining partners, fetch logos from their respective websites. Use a one-liner description for each partner until full content is provided by Paige.

Instruction for Niharika: Get partner logos from their websites and place them in the Partner Spotlight section. For partners where you already received a logo (at least one was shared), use it. For others, pull logos from the partner's public website. Use a brief one-liner for each until Paige provides full partner content.

CRITICAL Issue 5: Partner Content Needed from Paige

Owner:  Paige

Section: Partner Spotlight section

Screenshot Reference:

Partner Spotlight section: needs detailed partner content in the Amplified Concepts format

What's wrong: The Content Architecture doc has a detailed example for Amplified Concepts (Sherry Heyl partnership), but all other partners need the same level of content. The partners listed in the spec are: Autohive, Arna Intelligence, Georgia AI Alliance, AI for Good, TrainingPros, SweetRush, Amplified Concepts, Workfast Consulting (James Stovall), AI Collective (Mark Michelson), LDA, Gwinnett Entrepreneur Center. Content for most of these is currently missing.

Fix: Paige to provide partner content for each entry following the Amplified Concepts template: Partner logo/name, Founder name/title, tagline, 2-3 sentences on what the partnership enables for clients, one specific capability or outcome, and optional stat.

 **From Paige:** Please provide Partner Spotlight content for each partner using this format (same as the Amplified Concepts example in the Content Architecture doc):

- Partner logo + name
- Founder name + title
- Tagline: Their focus
- 2-3 sentences: What the partnership enables (for clients, not just TBG)
- One specific capability or outcome
- Optional: Small stat or result

Partners needing content: Autohive, Arna Intelligence, Georgia AI Alliance, AI for Good, TrainingPros, SweetRush, Workfast Consulting (James Stovall), AI Collective (Mark Michelson), LDA, Gwinnett Entrepreneur Center.

● CRITICAL Issue 6: Testimonials Content Needed from Paige

Owner: 🖋️ Paige

Section: Testimonials section

Screenshot Reference:

Testimonials section: placeholder content with no real quotes confirmed

What's wrong: The Testimonials section currently shows placeholder content. The Content Architecture doc lists four candidates (Chris & Rachel McCluskey, Lindsey Quistgaard, Sam Weber, Rick Walker) but notes they are "pending confirmation or replacement." Paige has not yet confirmed which testimonials to use or provided the final quotes.

Fix: Paige needs to confirm which testimonial quotes to display and provide the approved content.

🖋️ **From Paige:** Please decide and provide:

1. Which testimonials should appear on the About page? The doc lists: Chris & Rachel McCluskey (Professional Christian Coaching Institute), Lindsey Quistgaard (Director of Global Customer Enablement, Wellspring), Sam Weber, Rick Walker.
2. Approved quotes from each person (with their permission to publish).
3. Are there any new/different testimonials you'd prefer to use instead?

🔴 **CRITICAL** Issue 7: Team Section: AI-Generated Fake Names Must Be Removed

Owner: 🛠️ 📝 Both

Section: Team section ("Meet our beautiful team")

Screenshot Reference:

Team section showing three placeholder cards with initials PB, MC, JR: "Paige Bradbury," "Maria Chen," and "Jordan Reyes"

What's wrong: The Team section displays three cards: Paige Bradbury (real), Maria Chen "Learning Systems Architect" (NOT a real team member), and Jordan Reyes "Enterprise Capability Mo..." (NOT a real team member). Maria Chen and Jordan Reyes are AI-generated placeholder names. Publishing fake team members is a serious credibility issue.

Fix: Immediately remove the AI-generated fake team member cards (Maria Chen and Jordan Reyes). Only display real, confirmed team members. Paige must confirm who should appear in the team section.

🛠️ **Instruction for Niharika:** Remove the Maria Chen and Jordan Reyes cards immediately. These are AI-generated fake names and must not appear on the site under any circumstances. Keep only Paige Bradbury's card for now until Paige confirms the full team roster.

📝 **From Paige:** Please confirm: Who should appear in the "Team" section on the About page? The spec mentions Menchie. Please provide a complete list of team members with:

- Full name
- Title/role
- Photo (or confirm if placeholder initials are OK for now)
- Brief description (optional)

🟡 **IMPORTANT** Issue 8: AI-Generated Section Copy Needs Cleanup

Owner: 🛠️ Niharika

Section: Multiple sections across the About page

Screenshot Reference:

Various sections showing AI-generated copy that is not from the spec

What's wrong: Several sections on the About page contain copy that appears to be AI-generated and is not sourced from the Content Architecture document. This includes section introductions, descriptions, and transition text. AI-generated content is not approved for the live site.

Fix: Audit every text block on the About page against the Content Architecture document. Remove or replace any copy that is not sourced from the approved spec. When in doubt, use placeholder text like "[Content pending from Paige]" rather than leaving AI-generated filler.

🛠️ **Instruction for Niharika:** Go through every text element on the About page and cross-reference it against the Content Architecture Google Doc. If the text is not in the doc, remove it or replace with "[Content pending]". Do not leave AI-generated copy on the page.

🟡 **IMPORTANT** Issue 9: Accessibility: Text Readability and Contrast Issues

Owner: 🛠️ Niharika

Section: Partner Spotlight + various sections

Screenshot Reference:

Partner section showing low-contrast text and small numbering (01, 02) that is hard to read

What's wrong: The Partner Spotlight section and other areas have text that is difficult to read. Small numbered labels (01, 02) and partner descriptions have poor contrast against their backgrounds. Accessibility needs to be checked across the entire About page.

Fix: Run an accessibility audit on the About page. Ensure all text meets WCAG AA contrast ratio requirements (4.5:1 for normal text, 3:1 for large text). Fix any failing elements.

🛠️ **Instruction for Niharika:** Please check accessibility across the About page. Specifically: (1) Ensure all text is readable with sufficient contrast, (2) The 01/02 numbering in the Partner section is too small and low contrast, (3) Check with a contrast tool (WebAIM or similar) and fix all failures.

Summary

Severity	Count	Issue Numbers
----------	-------	---------------

 Critical	6	#1 Section order, #2 Intro not from spec, #3 Photo, #5 Partner content, #6 Testimonials, #7 Fake team names
 Important	3	#4 Partner logos, #8 AI copy cleanup, #9 Accessibility

Action Items by Person

Niharika (Dev/Design)

1. Reorder all About page sections to match the spec: Paige's Story → Advisory Board → Partner Spotlight → Testimonials → Team. Update nav dropdown too.
2. Remove the Condition 01/02/03 intro section (not in spec). Save the design as a reusable component.
3. Replace Paige's photo with the updated professional photographs.
4. Source and place actual partner logos from their websites.
5. IMMEDIATELY remove fake AI-generated team members (Maria Chen, Jordan Reyes). Keep only Paige Bradbury until Paige confirms roster.
6. Audit ALL copy on the page against the Content Architecture doc. Remove anything not in the spec.
7. Fix accessibility/contrast issues, especially in Partner Spotlight section.

Paige (Content Decisions)

1. Confirm: Can the current About page intro design (3 Condition cards) be repurposed for the footer?
2. Provide updated professional photographs if not already shared with the team.
3. Provide Partner Spotlight content for all partners using the Amplified Concepts template format.
4. Confirm which testimonials to display and provide approved quotes with permission.
5. Confirm the complete team roster: who appears in the Team section, with names, titles, and photos.

Columbus

Video Recording:

<https://app.clickup.com/90131418838/hubs/clips/761795d9-2e38-4851-9722-0402d84a40d6.webm>

Columbus Widget QA Feedback

Component: Columbus AI Voice Assistant (persistent widget, all pages)

Reviewer: Aparna Mopuru (Operations Manager)

Date: September 15, 2026

Source: Screen recording walkthrough + Content Architecture doc (Part 3: Columbus)

Priority: Fix before any external testing

OWNERSHIP LEGEND

-  Niharika (Dev/Design fix)
-  Shashank (Agent/AI backend fix)
-  Both (Frontend + Backend coordination needed)

SPEC REFERENCE: What Columbus Should Be

Per the Content Architecture doc (Part 3), Columbus is:

- "An AI voice assistant for The Bradbury Group" (NOT an executive advisor)
- It asks 5 quick readiness questions, compiles a report, and Paige reviews personally
- Flow: Expectations → Prep → Privacy Consent → Interview Launch
- Columbus should NOT speak until the user initiates the conversation
- It qualifies visitor intent and routes to the right page or a human

CRITICAL Issue 1: Columbus Is Labeled "EXECUTIVE ADVISOR" — Wrong Role Entirely

Owner:  Niharika

Section: Columbus widget header / label (visible on all pages)

Screenshot Reference:

Columbus widget in bottom-right corner showing "Columbus AI — EXECUTIVE ADVISOR — Talk to Assistant"

What's wrong: The Columbus widget displays the label "EXECUTIVE ADVISOR" next to "Columbus AI." This is completely wrong. Per the Content Architecture spec, Columbus is simply "An AI voice assistant for The Bradbury Group." It is NOT an executive advisor. It qualifies visitor intent, asks 5 readiness questions, and routes people. The "Executive Advisor" framing misrepresents what Columbus does and sets incorrect expectations.

Fix: Change the Columbus widget label from "EXECUTIVE ADVISOR" to "AI Voice Assistant" or simply remove the role subtitle. The spec defines Columbus as: "Hi! I'm Columbus. An AI voice assistant for The Bradbury Group."

🔧 **Instruction for Niharika:** Change the label on the Columbus widget from "EXECUTIVE ADVISOR" to "AI Voice Assistant" (or remove the subtitle entirely). This label appears on every page of the site and must match the spec exactly.

🔴 **CRITICAL** Issue 2: Expectations Tab: "Designed for Leaders" Framing Is Wrong

Owner: 🛠️ Niharika

Section: Columbus widget → Expectations tab

Screenshot Reference:

Expectations tab content showing "Designed for leaders" positioning that does not match the spec

What's wrong: The Expectations tab inside the Columbus widget contains content that says "Designed for leaders" and frames Columbus as an executive-focused tool. The spec says Columbus is for ALL visitors ("helps you figure out where you stand with AI right now"). It's designed for anyone visiting the site, not exclusively leaders. The current copy is AI-generated and does not match the Content Architecture document.

Fix: Replace all Expectations tab content with the spec copy. The spec header is: "Hi! I'm Columbus." Subhead: "An AI voice assistant for The Bradbury Group." Body should use the exact copy from Part 3 of the Content Architecture doc.

Instruction for Niharika: Replace the entire Expectations tab content with the approved copy from Part 3 of the Content Architecture doc. Key elements: Header "Hi! I'm Columbus", subhead "An AI voice assistant for The Bradbury Group", body explaining the 5-question readiness snapshot, and noting that Paige reviews responses personally. Remove all "Designed for leaders" language.

🟡 **IMPORTANT Issue 3: Flow Order: Prep Should Come Before Consent**

Owner: 🛠️ Niharika

Section: Columbus widget → tab flow

Screenshot Reference:

Columbus widget showing tab flow: Expectations → Prep → Talk (consent embedded in flow)

What's wrong: The current flow appears to be Expectations → Prep → Talk. Per the Content Architecture spec, the correct order is: Expectations → Prep ("Before You Start") → Privacy Consent → Interview Launch. The Prep screen should come before the consent step, giving users practical guidance before they agree to proceed.

Fix: Reorder the Columbus widget flow to match the spec: (1) Expectations, (2) Prep ("A Quick Heads-Up Before We Talk"), (3) Privacy Consent, (4) Talk/Interview. The "Before You Start" content from the spec should appear before the consent screen.

🔧 **Instruction for Niharika:** Verify and fix the tab flow order: Expectations first, then Prep (Before You Start), then Privacy Consent, then Talk. The current flow may have consent appearing before the prep content, which is wrong per spec. The Prep tab content from the spec includes: find a quiet moment, have a rough sense of what you're solving, first question will ask for a phone number, and honest answers help.

🔴 **CRITICAL** Issue 4: Post-Consent Content Is Wrong: "Enterprise Transformation Path"

Owner: 🛠️ ⚙️ Both (Niharika + Shashank)

Section: Columbus widget → after consent is given

Screenshot Reference:

After giving consent, the widget shows: "Our enterprise transformation path aligns. Strategic vision, operating architecture and human at the enterprise level" — content not from the spec

What's wrong: After the user gives consent and enters the Talk phase, the widget displays content about "enterprise transformation path," "strategic vision," "operating architecture" — none of which exists in the Content Architecture doc. This appears to be AI-generated content that was never approved. The spec says after consent, Columbus should simply launch the 5-question interview.

Fix: Remove all "enterprise transformation path" content. After consent, Columbus should transition directly into the interview flow: asking the user 5 readiness questions (role, biggest AI challenge, team knowledge level, top concerns, one quick win). No pitch, no enterprise framing.

Instruction for Niharika: Remove the "enterprise transformation path" content that appears after consent. After consent, the widget should transition to the Talk/Interview state where Columbus begins asking questions.

Instruction for Shashank: Verify the agent configuration. After privacy consent, Columbus should initiate the 5-question readiness interview (not deliver a pitch about enterprise transformation). The questions per spec are: (1) your role, (2) your biggest AI challenge, (3) your team's knowledge level, (4) your top concerns, (5) one quick win that would help most. Check if the agent is connected and configured to follow this script.

🔴 **CRITICAL Issue 5: Columbus Speaks Without User Initiating — Agent May Not Be Connected Properly**

Owner: 🛠️ Shashank

Section: Columbus widget → Talk tab

Screenshot Reference:

Talk tab showing Columbus already speaking ("Greetings. I'm Columbus, your AI Executive Advisor at The...") and a transcript log, before the user has said anything. Also shows "Conversation Paused" state

What's wrong: When the Talk tab is reached, Columbus immediately starts speaking ("Greetings. I'm Columbus, your AI Executive Advisor at The...") without the user saying anything first. The conversation transcript shows Columbus initiating. Columbus should NOT speak until the user starts the conversation. Additionally, it introduces itself as "your AI Executive Advisor" again (wrong title). The "Conversation Paused" state also appears, suggesting the agent may not be properly connected or configured.

Fix: Columbus must wait for the user to initiate. It should not auto-speak on page load or tab activation. Also verify the agent is properly connected to this widget and that the greeting message (if any) matches the spec.

Instruction for Shashank: Critical: (1) Columbus is auto-speaking when the Talk tab opens. It should wait for the user to speak first. Fix the agent trigger so it does not auto-initiate. (2) The greeting references "AI Executive Advisor" which is wrong. If a greeting is needed, it should match the spec tone. (3) Check if the agent is properly connected to this widget. The "Conversation Paused" state and the auto-initiation suggest a configuration issue. (4) Confirm the agent is set up to ask the 5 readiness questions from the spec, not deliver enterprise pitches.

🟡 **IMPORTANT** Issue 6: "Before You Start" / Prep Content Needs Spec Alignment

Owner: 🛠️ Niharika

Section: Columbus widget → Prep tab

Screenshot Reference:

Prep tab showing "Before You Start" content

What's wrong: The Prep tab ("Before You Start") appears to have some correct elements, but needs to be verified against the exact spec copy. The spec defines four specific prep items: (1) A Few Minutes, Uninterrupted, (2) What You're Working On, (3) We'll Start With Your Number, (4) Honest Answers Help Us Help You.

Fix: Cross-reference all Prep tab content with Part 3 of the Content Architecture doc, Screen 2 ("Before You Start"). Ensure all four bullet points match exactly.

🛠️ **Instruction for Niharika:** Verify the Prep tab content matches the spec exactly. The four items should be: "A Few Minutes, Uninterrupted" (find a quiet moment), "What You're Working On" (rough sense of what you're solving), "We'll Start With Your Number" (first question asks for phone number), "Honest Answers Help Us Help You" (the more specific, the more useful the follow-up).

Summary

Severity	Count	Issue Numbers
 Critical	4	#1 Wrong label, #2 Wrong framing, #4 Wrong post-consent content, #5 Agent auto-speaks
 Important	2	#3 Flow order, #6 Prep content alignment

Action Items by Person

Niharika (Frontend / Widget UI)

1. Change Columbus label from "EXECUTIVE ADVISOR" to "AI Voice Assistant" across all pages.
2. Replace Expectations tab content with approved copy from Part 3 of Content Architecture doc. Remove "Designed for leaders" entirely.
3. Fix tab flow order: Expectations → Prep → Talk.
4. Remove "enterprise transformation path" content that appears post-consent.
5. Verify Prep tab content matches spec exactly (4 bullet points).

Shashank (Agent / AI Backend)

1. FIX: Columbus auto-speaks when Talk tab opens. Agent should wait for user to initiate.
2. FIX: Agent greeting says "AI Executive Advisor." Update to match spec role (voice assistant).
3. VERIFY: Is the Columbus agent properly connected to this widget? The "Conversation Paused" state and auto-initiation suggest a config issue.
4. VERIFY: Agent should ask the 5 readiness questions from the spec (role, biggest AI challenge, team knowledge level, top concerns, one quick win). Not deliver enterprise pitches.
5. VERIFY: After the interview, responses should compile into a readiness report for Paige's personal review. Confirm this pipeline is working.

NOTE: No action items for Paige on the Columbus widget. All fixes are dev/design (Niharika) and agent/backend (Shashank).

For You

For You Page QA Feedback

Page: dev.thebradburygroup.net/for-you

Reviewer: Aparna Mopuru (Operations Manager)

Date: September 15, 2026

Source: Screen recording walkthrough + Content Architecture doc (For You Page section)

Spec Status: Ready for Paige's Review > Designer handoff (last updated July 29, 2026)

Priority: Major content gaps. Most sections need full replacement with spec copy.

OWNERSHIP LEGEND

🔧 Niharika (Dev/Design fix)

✍️ Paige (Content decision needed)

🔧 ✍️ Both

🔴 CRITICAL Issue 1: Hero Section: Headline, Copy, and Layout Are Completely Wrong

Owner: 🔧 Niharika

Section: Section 1: Hero + Urgency

Screenshot Reference:

Hero section showing "Executive AI Fluency, For You" with generic descriptive copy instead of the spec headline

What's wrong: The live hero says "Executive AI Fluency, For You" with generic descriptive text about "individual executive coaching, personal AI agent workflows." The spec requires:

- Headline: "We rebuilt how our team learns AI. Here's the playbook."
- Subheadline about random tutorials not cutting it
- Full narrative body copy about smart people spending months dabbling
- 60/40 layout: text left, Aurilis video right
- Primary CTA: "Now It's Your Turn" (scroll to phases)
- Secondary: "Watch Aurilis's story" (video embed)

The current hero is a completely different page. None of the spec content is present.

Fix: Replace the entire hero section with the spec copy from Section 1 of the For You page architecture. Use the 60/40 text-left/video-right layout. Include the Aurilis video embed.

🔧 **Instruction for Niharika:** Replace the full hero with the Content Architecture spec copy. Layout: 60% text (left) with headline "We rebuilt how our team learns AI. Here's the playbook." and the full body copy, 40% video (right) with Aurilis's 30-second case study intro. CTA button: "Now It's Your Turn" scrolling to the phase decision section. Secondary text link: "Watch Aurilis's story."

🔴 **CRITICAL** Issue 2: Business Case Section (3 Stat Cards) Is Completely Missing

Owner: 🔧 Niharika

Section: Section 2: Business Case

Screenshot Reference:

Area where Business Case section should appear: instead shows generic value-prop blocks (Organizational Fluency, Measurable ROI, Peer Network)

What's wrong: The spec's Section 2 ("Here's what we know") with three stat cards is entirely absent. Instead, the page shows four generic value propositions (Personalized Adaptive Curriculum, Self-Paced, Applied Real Workflow Practice, Vetted Governance-First) followed by three blocks (Organizational Fluency, Measurable ROI, Peer Network). None of these exist in the spec.

The spec requires:

Card 1: "The federal standard is already here" (DOL AI Literacy Framework)

Card 2: "The gap is already costly"

Card 3: "Structured beats random. Every time."

Mid-page CTA: "What's the one workflow you'd fix with AI?"

Fix: Remove the generic value-prop blocks and the Organizational Fluency/Measurable ROI/Peer Network sections. Replace with the three-column stat card layout from spec Section 2.

Instruction for Niharika: Remove ALL of the following from the page: "Personalized Adaptive Curriculum," "Self-Paced Learn on Your Schedule," "Applied Real Workflow Practice," "Vetted Governance-First Approach," "Organizational Fluency," "Measurable ROI," "Peer Network." None of these are in the spec. Replace with three stat cards using the exact copy from Section 2 of the For You spec. Add mid-page CTA button: "What's the one workflow you'd fix with AI?" linking to enrollment form.

🟡 **IMPORTANT** Issue 3: Phase 1 / Phase 2 Decision Framework: Content Needs Spec Alignment

Owner: 🛠️ Niharika

Section: Section 3: Decision Framework

Screenshot Reference:

Side-by-side Phase 1 (AI Literacy) and Phase 2 (AI Fluency) comparison cards

What's wrong: The live page has a Phase 1/Phase 2 comparison, which is the right structure, but the content is abbreviated compared to the spec. The spec includes:

- Section header: "Two phases."
- Phase 1 subtitle: "Learn to speak AI" with "Best if" bullets, detailed "What you'll learn" list, duration, and certificate info
- Phase 2 subtitle: "Solve a real problem" with similar detail
- Each card should have its own CTA button ("Apply for Phase 1" / "Apply for Phase 2") linking to Maven

The live version condenses this and may be missing several curriculum bullets.

Fix: Cross-reference the Phase 1 and Phase 2 card content with the spec word-for-word. Add any missing "Best if" bullets, curriculum items, and ensure CTAs say "Apply for Phase 1" / "Apply for Phase 2" linking to Maven with pre-filled phase selection.

🛠️ **Instruction for Niharika:** Compare each bullet point in both Phase cards against the Content Architecture doc Section 3. Add any missing "Best if" criteria and "What you'll learn" items. Verify the CTAs link to the correct Maven enrollment pages with phase pre-selected.

🔴 **CRITICAL** Issue 4: "What You'll Master" Section (DOL Competency Framework) Is Missing

Owner: 🛠️ Niharika

Section: Section 4: What You'll Master

Screenshot Reference:

Area where DOL competency grid should appear: section is entirely absent from the live page

What's wrong: The spec's Section 4 is a grid of 5 U.S. Department of Labor AI Literacy Framework competency boxes (Understand AI, Use AI Effectively, Direct AI Effectively, Evaluate Outputs Responsibly, Use AI Responsibly). This entire section does not exist on the live page.

The spec header is: "Five U.S. Department of Labor framework competencies. Covered."
Post-section CTA: "Where are the gaps for you or your team right now?" scrolling back to the decision framework.

Fix: Add the full "What You'll Master" section between the Decision Framework and the Proof section. Use a 6-box grid layout (3 columns desktop, 2 tablet, 1 mobile).

🛠️ **Instruction for Niharika:** Build a new section using the spec content for Section 4 ("What You'll Master"). Create a responsive grid with 5 competency boxes. Each box has a competency name and description from the spec. Header: "Five U.S. Department of Labor framework competencies. Covered." Include the DOL framework image reference and the post-section CTA.

🔴 **CRITICAL** Issue 5: Proof Section: Real Case Studies (Aurilis, Teresa, Leah) Are Completely Missing

Owner: 🛠️📝 Both

Section: Section 5: Proof from Real Cohorts

Screenshot Reference:

Testimonial area showing only placeholder quotes: "VP of Operations, Enterprise Client: Quote pending confirmation & release" with Pending badges

What's wrong: The spec calls for three detailed case study story cards with hard metrics:

Card 1 (Aurilis Sanchez): Built AI tool in <2 hours, 98% time reduction, 5+ hrs to <2 min

Card 2 (Teresa Waggoner): Tested 3 tools, 64% less research time, <7 min for best output

Card 3 (Leah Otsig): Cut approval from 14 days to 5 days, 75% fewer revisions

Plus a metrics bar: "66-80% confidence gains" | "2+ hrs/week freed" | "75%+ faster task completion"

The live page instead shows three generic "Enterprise Client" placeholder testimonials with "Quote pending confirmation & release" and "Pending" badges. This is placeholder content that must be replaced.

Fix: Replace the placeholder testimonials with the three named case study cards from spec Section 5, including full metrics and the supporting metrics bar. Add CTA: "I want results like this."

 **Instruction for Niharika:** Build three case study cards using the exact content from spec Section 5 (Aurilis Sanchez, Teresa Waggoner, Leah Otsig). Each card needs: Role, Headline, The Problem, The Solution, The Metrics, The Skill Gained. Add Aurilis's 30-sec video embed. Below the three cards, add the metrics bar with three stat callouts. CTA button: "I want results like this" linking to enrollment form.

 **Instruction for Paige:** The spec includes detailed case studies for Aurilis, Teresa, and Leah from Cohort 1. Please confirm these are still approved for the live site, or provide any updated case study content.

CRITICAL Issue 6: Pricing Is Wrong: Shows \$1,200/\$1,200/\$2,000 vs Spec's \$495/\$695/\$995

Owner:   Both

Section: Section 7: Investment & ROI

Screenshot Reference:

Tuition section showing pricing: Phase 1 \$1,200, Phase 2 \$1,200, Bundle \$2,000

What's wrong: The live page displays pricing of \$1,200 per phase and \$2,000 for the bundle. The Content Architecture spec states:

- Phase 1 (AI Literacy): \$495

- Phase 2 (AI Fluency): \$695
- Bundle (Both Phases): \$995 (Save \$195)

The spec also notes: "Pricing valid through July 31. Starts August 1 at \$1,325 for the bundle."

IMPORTANT: The spec says pricing should NOT be hardcoded into page copy. Paige prefers pricing to live on the Maven sign-up page where it can be updated independently.

Fix: Remove hardcoded pricing from the page. Either link to Maven for current pricing, or get Paige's confirmation on which prices to display.

 **Instruction for Niharika:** Do NOT use the \$1,200/\$2,000 pricing. These are wrong. Do NOT hardcode any pricing without Paige's explicit approval. For now, either remove the pricing table or replace with "See current pricing" linking to the Maven enrollment page.

 **Instruction for Paige:** PRICING DECISION NEEDED: The live page shows \$1,200/\$1,200/\$2,000. The spec says \$495/\$695/\$995 (valid through July 31, then \$1,325 bundle after Aug 1). Which pricing is current? Also: the spec recommends NOT hardcoding prices on the page. Should we link to Maven instead so you can update pricing independently?

IMPORTANT Issue 7: Tax & Reimbursement Section Is Generic: Missing Three Specific Tax Options

Owner:  Niharika

Section: Section 7: Investment & ROI (right column)

Screenshot Reference:

Tax & Employer Reimbursement section showing generic text without the three specific tax credit options

What's wrong: The live page has a generic paragraph about employer reimbursement. The spec calls for three specific, detailed tax options:

- Option 1: Georgia Retraining Tax Credit (50% of costs, up to \$500/employee)
- Option 2: IRS Section 127 (\$5,250/year tax-free educational assistance)
- Option 3: Federal Policy Shift (AI Workforce Training Act, H.R. 7576)

Plus three concrete ROI examples (Aurilis, Teresa, Leah payback calculations).

Fix: Replace the generic tax paragraph with the three specific tax options from the spec, each with its own card/block. Add the three ROI example calculations below.

🔧 **Instruction for Niharika:** Build three tax option blocks using spec Section 7 content. Each block should have a heading and body copy. Include the IRS and Congress.gov links from the spec. Below the tax section, add three ROI example calculations (Aurilis: payback <3 weeks, Teresa: payback <2 weeks, Leah: payback <1 week) with the exact math from the spec.

🟡 **IMPORTANT** Issue 8: Certificate Section Needs Spec Alignment

Owner: 🛠️ Niharika

Section: Section 6: What You'll Earn

Screenshot Reference:

Certificate section showing "OF COMPLETION" with bullet points

What's wrong: The certificate section exists but needs verification against the spec. The spec says:

- Header: "Credentials come through building the skills."
- Body explains the Integrated Performance Measurement Framework (IPMF)
- Caption: "Your credential of participation, signed by Paige Bradbury, CEO & Principal Learning Architect"
- The current "Signed by The Solomon Engine" text is WRONG (Solomon Engine is the executive program, not the For You cohort)

The live page also mentions "Counts toward Enterprise Architecture track" which is not in the spec.

Fix: Replace certificate section content with spec copy. Remove "Signed by The Solomon Engine" and "Counts toward Enterprise Architecture track."

Instruction for Niharika: Fix the certificate section: (1) Remove "Signed by The Solomon Engine" (wrong program). (2) Remove "Counts toward Enterprise Architecture track" (not in spec). (3) Replace with spec content: header "Credentials come through building the skills", body about IPMF, and caption "Your credential of participation, signed by Paige Bradbury, CEO & Principal Learning Architect." (4) Show a blurred credential image placeholder.

🟡 **IMPORTANT** Issue 9: Manager Recommendation Letter Section Needs Full Spec Content

Owner: 🛠️ Niharika

Section: Section 8: Manager Recommendation Letter

Screenshot Reference:

Manager sign-off section showing download template option

What's wrong: The section exists but appears abbreviated. The spec calls for a split layout: left side shows a letter preview (first 150 words of the actual letter), right side has the download button. The spec includes detailed letter excerpt content with business case bullets, ROI metrics, and clear role definitions for the manager.

Fix: Build the full manager letter section per spec: split layout with letter preview on left and download CTA on right. Include the letter excerpt text from the spec.

Instruction for Niharika: Build the Manager Letter section as a two-column layout per spec Section 8. Left: bordered preview area showing the first 150 words of the letter (use the excerpt from the spec starting with "Your employee needs baseline AI fluency..."). Right: "Download manager letter (PDF)" button + optional copy-paste text area. Note below preview: "Full letter included in download. Customize as needed."

🟡 **IMPORTANT** Issue 10: "How the Cohort Works" Steps Section: Not in Spec

Owner: 🛠️ Niharika

Section: How the Cohort Works (6 steps)

Screenshot Reference:

How the Cohort Works section showing steps 01-05 visible: Orientation, Tool Setup, Workflow Design, Guided Practice, Governance Review

What's wrong: The live page has a "How the Cohort Works" section with 6 steps (Orientation, Tool Setup, Workflow Design, Guided Practice, Governance Review, + one more). This section does not exist in the Content Architecture spec for the For You page. The spec defines sections in this order: Hero, Business Case, Decision Framework, What You'll Master, Proof, Credentials, Investment & ROI, Manager Letter, Enrollment Form.

Fix: This section appears to be AI-generated content not from the spec. Paige should decide whether to keep, modify, or remove it.

 **Instruction for Niharika:** Flag this section for Paige's review. It is not in the Content Architecture spec. Do not remove yet, but clearly mark it as "pending approval" in your internal notes.

 **Instruction for Paige:** The "How the Cohort Works" section (6 steps: Orientation, Tool Setup, Workflow Design, Guided Practice, Governance Review, + 1 more) is NOT in the Content Architecture spec. Would you like to keep it, modify it, or remove it? If keeping, please provide approved copy for each step.

🟡 **IMPORTANT Issue 11: Enrollment Form: Verify Fields Match Spec and HubSpot Embed**

Owner:  Niharika

Section: Section 9: Apply for Your Cohort

Screenshot Reference:

The screenshot shows a web browser window with the URL dev.thebraadburygroup.net/for-you. The page has a dark blue header with navigation links: Home, About, For You (active), For Leaders, For Organizations, Our ROI, Resources, and Contact. A yellow button labeled "Book a Discovery Call" is in the top right. Below the header, there are three cards with "Pending" status and a "View Resources (PDF)" button. A stats bar shows "Completion Rate" (empty), "3 HRS/WEEK Typical Commitment", and "Reported Time Saved" (empty). The main section is titled "Ready to Get Started?" and contains a form with fields for "Full Name", "Work Email", "Topic of Interest", and "Preferred Cohort", along with a text area for "Anything else we should know?". A yellow "Submit Inquiry" button is at the bottom right of the form. A "Columbus AI" chatbot is visible in the bottom right corner.

Enrollment form at bottom of page showing fields: Full Name, Work Email, Topic of Interest, Preferred Cohort, text area, Submit Inquiry button

What's wrong: The enrollment form exists and the structure looks reasonable. However, the spec calls for a HubSpot form embed with specific fields: Name (required), Email (required), Company (optional), Your role (optional), Which phase + biggest AI challenge (optional text area), How did you hear about us (optional). The live form shows "Topic of Interest" and "Preferred Cohort" dropdowns which differ from the spec. Also, the spec header is "Let's get you into a cohort" and the button should say "Let's get started" (not "Submit Inquiry").

Fix: Verify the form is the HubSpot embed from the spec. Update fields to match spec, change header to "Let's get you into a cohort," and button text to "Let's get started."

Instruction for Niharika: Verify this is the HubSpot form embed (URL from spec: <https://share-na2.hsforms.com/2T9Meps13RsyPWay9SckNaQ42qq7r>). Update: (1) Header to "Let's get you into a cohort", (2) Intro copy from spec, (3) Form fields to match spec (Name, Email, Company, Role, Which phase + challenge, How did you hear about us), (4) Button text to "Let's get started."

🟡 IMPORTANT Issue 12: Stats Bar Shows Empty Dashes for Completion Rate and Time Saved

Owner: 🛠️ 📝 Both

Section: Bottom stats area

Screenshot Reference:

Stats bar showing "— Completion Rate," "3 HRS/WEEK Typical Commitment," "— Reported Time Saved"

What's wrong: The stats bar near the bottom shows three metrics but two of them display only dashes: "— Completion Rate" and "— Reported Time Saved." Only "3 HRS/WEEK Typical Commitment" has a value. The spec does not define this exact stats bar, but the proof section includes metrics like "66-80% confidence gains," "2+ hrs/week freed," and "75%+ faster task completion" which belong in Section 5, not as a standalone stats bar.

Fix: Either populate the stats with real data from the spec's metrics bar (Section 5), or remove this standalone stats bar entirely since the metrics belong in the Proof section.

🔧 **Instruction for Niharika:** Either: (a) Move these stats into the Proof section as the spec's metrics bar ("66-80% confidence gains" | "2+ hrs/week freed" | "75%+ faster task completion") and remove the standalone stats bar, or (b) remove the standalone stats bar entirely since the spec doesn't call for it in this location.

📝 **Instruction for Paige:** Do you want a standalone stats bar on the page? The spec puts metrics inside the Proof section. If you want this separate bar, please provide the actual numbers for Completion Rate and Reported Time Saved.

🟡 IMPORTANT Issue 13: AI Fluency Cohort Overview

Video Placeholder

Owner: 🛠️ Niharika

Section: Near the top of page

Screenshot Reference:

Section showing "AI Fluency Cohort Overview: A two-minute primer on the cohort format, curriculum, and outcomes" with video placeholder area

What's wrong: There is a placeholder for an "AI Fluency Cohort Overview" video described as "A two-minute primer on the cohort format, curriculum, and outcomes." This is not a defined section in the spec. The spec calls for the Aurilis video in the hero (40% right side), not a separate cohort overview video.

Fix: This placeholder should be replaced with the Aurilis video in the hero section (per spec). If this is a separate cohort overview video Paige wants to add, it needs her approval.

Instruction for Niharika: Remove this standalone video placeholder if it is meant to be the Aurilis video (move it to the hero instead). If it is a different video, flag for Paige's approval.

Summary

Severity	Count	Issue Numbers
Critical	5	#1 Hero wrong, #2 Business Case missing, #4 DOL section missing, #5 Case studies missing, #6 Pricing wrong

Action Items by Person

Niharika (Dev/Design)

1. Replace entire hero section with spec copy (headline, body, 60/40 layout with Aurilis video, CTAs).
2. Remove all generic value-prop blocks (not in spec). Build the 3 stat cards from spec Section 2.
3. Verify Phase 1/Phase 2 cards match spec word-for-word.
4. Build the "What You'll Master" DOL competency grid (spec Section 4). This is a new section.
5. Replace placeholder testimonials with 3 real case study cards (Aurilis, Teresa, Leah) from spec Section 5.
6. Remove hardcoded pricing (\$1,200/\$2,000). Wait for Paige to confirm current pricing or link to Maven.
7. Build 3 specific tax option blocks from spec Section 7 + 3 ROI calculations.
8. Fix certificate section: remove Solomon Engine reference, use spec copy.
9. Build full manager letter section (2-column layout with preview + download).
10. Update enrollment form to match spec fields and HubSpot embed.

Paige (Content Decisions)

1. PRICING: What are the current prices? The page shows \$1,200/\$2,000, spec says \$495/\$695/\$995. Which is correct? Should pricing be on the page or on Maven only?
2. Confirm: Are the Aurilis/Teresa/Leah case studies still approved for the live site?
3. Keep or remove the "How the Cohort Works" 6-step section? It's not in the spec.
4. Stats bar: provide actual Completion Rate and Reported Time Saved numbers, or approve removal.

For Leader's

For Leaders Page QA Feedback

<https://sharing.clickup.com/clip/p/t90131418838/5cc1ed6a-79a4-4df3-9583-10991b25daf3/5cc1ed6a-79a4-4df3-9583-10991b25daf3.webm?filename=screen-recording-2026-09-15-17:59.webm>

Page: dev.thebradburygroup.net/leaders

Reviewer: Aparna Mopuru (Operations Manager)

Date: September 15, 2026

Source: Screen recording walkthrough + Content Architecture doc (For Leader Page_New section)

Spec Version: For Leader Page_New (September 4, 2026). Note: Walter Track removed from this page per spec.

Priority: Multiple content and nav issues. Fix before Paige review.

OWNERSHIP LEGEND

 Niharika (Dev/Design fix)

 Paige (Content needed)

CRITICAL Issue 1: Nav Dropdown Submenus Are Wrong: Enterprise Tier, Small Business Tier Are Not in the New Spec

Owner:  Niharika

Section: Global Nav > For Leaders dropdown

Screenshot Reference:

For Leaders dropdown showing: Enterprise Tier, Small Business Tier, Tax & Reimbursement, Apply/Interview, Walter

What's wrong: The For Leaders nav dropdown shows: Enterprise Tier, Small Business Tier, Tax & Reimbursement, Apply/Interview, Walter. The new spec (For Leader Page_New, Sept 4, 2026) has completely restructured this page. The correct nav anchors should be:

- Try the AI Interview (#solomon-interview)
- The 12-Week Journey (#solomon-engine)
- Reimbursement & Support (#reimbursement)

Walter Track has been REMOVED from this page per spec. Enterprise/Small Business tiers are from the OLD spec.

Fix: Update the For Leaders nav dropdown to match the new spec anchors. Remove Enterprise Tier, Small Business Tier, and Walter. Replace with: Try the AI Interview, The 12-Week Journey, Reimbursement & Support.

Instruction for Niharika: Update the For Leaders dropdown to these anchors only: (1) Try the AI Interview, (2) The 12-Week Journey, (3) Reimbursement & Support. Remove Enterprise Tier, Small Business Tier, and Walter. Walter Track is no longer on this page (HR/L&D leaders route to For Organizations instead).

● **CRITICAL Issue 2: Hero: Andy Ivey's Photo and Video Are Missing**

Owner: Niharika

Section: Section 1: Hero + Andy Ivey Hook

Screenshot Reference:

Hero section showing headline and Andy's quote card but no photo or video of Andy

What's wrong: The hero section has the correct headline ("I'm terrified of AI. I don't know where to start.") and the Participant File / 001 card with Andy's quote. However, Andy Ivey's photograph and/or video are completely missing. The spec says: "Hero Visual Strategy: 60% text / 40% visual (Andy's image or video testimonial)." There was a deck shared with Niharika specifically for visual inspiration for Andy's presentation.

Fix: Add Andy Ivey's photo or video to the hero section. Use the 60/40 layout from the spec. Reference the Canva deck that was previously shared for visual treatment.

Instruction for Niharika: Add Andy Ivey's photo or video testimonial to the hero. The deck was previously shared with you for design inspiration. The hero should be 60% text (left) / 40% Andy's visual (right). If you don't have Andy's photo, ask Aparna or Paige for the asset.

🟡 **IMPORTANT** Issue 3: Proof Section: Andy's ROI Breakdown Doesn't Look Like ROI

Owner: 🛠️ Niharika

Section: Section 2: The Proof

Screenshot Reference:

Proof section showing a ledger-style table with LINE ITEM and RECOVERED columns

What's wrong: The proof section shows a table with "LINE ITEM" and "RECOVERED" columns, but it looks like a flat list rather than a compelling ROI visualization. The spec references design slides (Canva Slide 4 and Slides 13-14) for how to present Andy's 6-week breakdown and annual ROI visually. The current format doesn't sell the ROI story effectively.

Fix: Redesign the ROI visualization using the Canva deck references from the spec. The 6-week breakdown should feel like a visual progression, not a plain table. The "\$13.83 for every dollar invested" stat needs prominent visual treatment.

Instruction for Niharika: Reference the Canva decks in the spec for ROI visualization inspiration:

- Slide 4: <https://www.canva.com/design/DAHMXssXTYU/4Dpe-SQWmcBV0GQ7JlYu9w/edit> (6-week breakdown)

- Slides 13-14: <https://www.canva.com/design/DAHPAQXpBjE/a7H9xt-yGB7HdJl6SlfzHA/edit> (annual ROI)

Make the ROI data visually compelling. The "\$13.83 per dollar" stat should use Terracotta accent for emphasis per spec.

🟡 **IMPORTANT** Issue 4: "And He Isn't the Only One"

Section: Content Source Unclear

Owner: 🛠️ Niharika

Section: Section 2: The Proof (secondary proof point)

Screenshot Reference:

Section showing "AND HE ISN'T THE ONLY ONE" with NCEMCH executive director quote and "ACROSS SECTORS" statement

What's wrong: The "And He Isn't the Only One" section with the NCEMCH quote and "Across Sectors" breadth statement appears on the page. This content IS in the new spec. However, verify that the exact copy matches the spec, particularly the NCEMCH quote and the "across sectors" language.

Fix: Cross-reference this section's copy against the spec word-for-word. The NCEMCH quote should be: "Structured AI assistants moved me from 'doer' to 'approver.' Executive bandwidth is now for strategy, not coordination."

🔧 **Instruction for Niharika:** Verify the NCEMCH quote and "Across Sectors" section match the spec exactly. The quote is from the Executive Director of NCEMCH. The breadth statement should read: "We've partnered with federal agencies, municipalities, nonprofits, and private-sector teams. The industries change. The framework adapts. The results are consistent."

🔴 **CRITICAL** Issue 5: Two Paths Section: "Start Interview" Must Link to HubSpot Waitlist Form, NOT Current Link

Owner: 🔧 Niharika

Section: Section 4: Start Here (Two Paths)

Screenshot Reference:

Two paths section showing Path 01 (Interview) and Path 02 (Enroll) with CTA buttons

What's wrong: The "Start the Interview" button under Path 1 needs to link to the HubSpot waitlist form, NOT whatever it currently links to. The waitlist form in HubSpot captures leads for the beta program. The current link destination is wrong.

Fix: Update the "START THE INTERVIEW" button to link to the HubSpot waitlist form. Get the correct HubSpot form URL from Aparna.

Instruction for Niharika: The "START THE INTERVIEW" CTA must link to the HubSpot waitlist form. Ask Aparna for the exact HubSpot form URL. Do NOT use any other link. The "ENROLL NOW" button for Path 2 should also link to the HubSpot enrollment form (may be a different form).

● **CRITICAL** Issue 6: Custom AI Arsenal (Mr. Miyagi, Vertical, Dash) Content Is Missing

Owner: 🛠️ Niharika

Section: Section 5: The Journey (tabbed content)

Screenshot Reference:

Journey section showing weeks 1-4 / 5-8 / 9-12 tabs but missing AI assistant details

What's wrong: The spec's Section 5 (The Journey) includes a tabbed "Your custom AI arsenal" subsection describing three custom AI assistants:

- Mr. Miyagi (Strategic Coach)
- Vertical (Custom Domain)
- Dash (Brand Content Engine)

These descriptions are not visible on the current page. The organizational blueprint (collapsed toggle) also needs to be present.

Fix: Add the "Your custom AI arsenal" tabbed content with Mr. Miyagi, Vertical, and Dash descriptions from the spec. Add the organizational blueprint as a collapsible toggle section.

Instruction for Niharika: Build the "Your custom AI arsenal" as tabbed content within the Journey section. Three tabs:

1. Mr. Miyagi (Strategic Coach): "Your thinking partner for strategic decisions, board presentations, and five-year planning."
2. Vertical (Custom Domain): "Built for your specific needs. Grant writing, financial analysis, data strategy..."
3. Dash (Brand Content Engine): "Maintain your voice while accelerating your messaging, thought leadership..."

Also add organizational blueprint as a collapsible toggle per spec.

CRITICAL Issue 7: Next Cohort Information Is Missing

Owner: Niharika

Section: Section 5: The Journey (Investment & Cohorts)

Screenshot Reference:

Journey/Investment section: no cohort dates visible

What's wrong: The spec defines:

- INVESTMENT: Customized to your situation, timeline, and scope. Andy's engagement was \$4,500.
- NEXT COHORTS: Q4 2026, Q1 2027, Q2 2027
- Applications close 30 days before start

No cohort date information appears on the live page.

Fix: Add the cohort dates and application deadline info from the spec.

🔧 **Instruction for Niharika:** Add: "NEXT COHORTS: Q4 2026 · Q1 2027 · Q2 2027" and "Applications close 30 days before start" to the Investment area of the Journey section.

🔴 **CRITICAL** Issue 8: Pricing Should NOT Be on This Page

Owner: 🛠️ Niharika

Section: Reimbursement / Investment area

Screenshot Reference:

Area where pricing may be displayed on the page

What's wrong: Pricing appears to be placed on the page. Per the new spec, the For Leaders page should say: "INVESTMENT: Customized to your situation, timeline, and scope. Andy's engagement was \$4,500." There should be NO pricing table or specific dollar amounts beyond Andy's reference point. The spec says "Contact us for pricing" to signal premium, customized positioning.

Fix: Remove any pricing table or specific pricing. Replace with the spec's investment language: "Customized to your situation, timeline, and scope. Andy's engagement was \$4,500."

Instruction for Niharika: Remove any hardcoded pricing from this page. The investment section should only say: "Customized to your situation, timeline, and scope. Andy's engagement was \$4,500." This signals premium positioning. No price tables.

🟡 **IMPORTANT** Issue 9: Reimbursement Section: Verify Links Are Placed

Owner: 🛠️ Niharika

Section: Section 6: Reimbursement & Support

Screenshot Reference:

Reimbursement section with tax deduction info

What's wrong: The Reimbursement section exists and the format looks reasonable, but links need to be verified. The spec includes an IRS Section 162 reference and a "Download Full Tax Guide PDF" CTA button. Verify all links are functional and the PDF download works.

Fix: Check all links in the Reimbursement section. Ensure the "Download Full Tax Guide PDF" button links to an actual PDF asset. Verify the IRS reference link works.

🔧 **Instruction for Niharika:** Verify: (1) IRS Section 162 info is accurate, (2) "Download Full Tax Guide PDF" button links to actual PDF, (3) all external links work. Format should follow the spec: scannable bullets for What Qualifies, Deduction Requirements, What We Provide, Your Next Step.

🟡 **IMPORTANT** Issue 10: Closing Section: Verify "Resources" Footer Link Destination

Owner: 🛠️ Niharika

Section: Closing / Footer

Screenshot Reference:

Bottom of page showing closing CTA and footer area

What's wrong: The closing section ("The Window Is Open. But It Won't Stay Open.") content appears to align with the spec's Section 8 closing. The enrollment form with AI Interview / Direct Enroll tabs also appears present. However, the footer link to "Resources" in the bottom-left corner of the page needs to be verified.

Fix: Verify the closing CTA copy matches spec Section 8. Confirm the enrollment form tabs (AI Interview / Direct Enroll) work correctly. Check footer links.

🔧 **Instruction for Niharika:** Verify: (1) Closing headline matches spec: "See What's Possible", (2) Body copy matches spec, (3) CTA links to interview/enrollment correctly, (4) Check all footer links work.

🟡 **IMPORTANT** Issue 11: Overall Content Alignment: Cross-Reference ALL Copy Against New Spec

Owner: 🛠️ Niharika

Section: Full page

Screenshot Reference:

Full page view showing various sections

What's wrong: The page uses the NEW spec (For Leader Page_New, Sept 4, 2026) which is a significant rewrite from the old version. While the major sections are present (Hero, Proof, Philosophy Quote, Two Paths, Journey, Reimbursement, Closing), every section's body copy needs to be verified line-by-line against the new spec. Any copy from the OLD spec or AI-generated content must be replaced.

Fix: Do a full line-by-line comparison of all body copy on the page against the For Leader Page_New spec. Replace any copy that doesn't match.

Instruction for Niharika: Go through every text element on this page and cross-reference against the "For Leader Page_New" section of the Content Architecture doc. This is the FINAL approved copy (Sept 4, 2026). Any text not matching must be replaced. Pay special attention to Paige's first-person voice ("Every discovery call I take..." "I customize every session...").

Summary

Severity	Count	Issue Numbers
● Critical	5	#1 Nav wrong, #2 Andy photo, #5 Waitlist link, #6 AI arsenal missing, #7 Cohort dates, #8 Pricing

Action Items by Person

Niharika (Dev/Design)

1. Fix nav dropdown: Remove Enterprise Tier, Small Business Tier, Walter. Replace with spec anchors.
2. Add Andy Ivey's photo/video to the hero (60/40 layout). Use the Canva deck for inspiration.
3. Redesign ROI visualization using Canva deck references (Slides 4, 13-14).
4. Update "START THE INTERVIEW" CTA to HubSpot waitlist form URL (ask Aparna).
5. Build "Your custom AI arsenal" tabbed content (Mr. Miyagi, Vertical, Dash) + org blueprint toggle.
6. Add cohort dates: Q4 2026, Q1 2027, Q2 2027. Applications close 30 days before start.
7. Remove all hardcoded pricing. Use: "Customized to your situation. Andy's engagement was \$4,500."
8. Verify all links in Reimbursement section + Tax Guide PDF download.
9. Full line-by-line copy audit against For Leader Page_New spec (Sept 4, 2026).
10. Verify NCEMCH quote and "Across Sectors" copy match spec exactly.

Paige (Content)

No major content decisions needed for this page. The spec (For Leader Page_New) is marked as "Copy final, ready for build." Niharika should implement it as written. Paige reviews the final build for tone and accuracy.

For Organization

For Organizations Page QA Feedback

Page: dev.thebradburygroup.net/organisation

Reviewer: Aparna Mopuru (Operations Manager)

Date: September 15, 2026

Source: Screen recording + Content Architecture doc (For Organization_New section)

Video Recording:

<https://sharing.clickup.com/clip/p/t90131418838/5cc1ed6a-79a4-4df3-9583-10991b25daf3/5cc1ed6a-79a4-4df3-9583-10991b25daf3.webm?filename=screen-recording-2026-09-15-17:59.webm>

Priority: Content-heavy page needs Paige's review for conciseness. Several structural items need attention.

OWNERSHIP LEGEND

🔧 Niharika (Dev/Design fix)

✍️ Paige (Content decision / input needed)

🟡 **IMPORTANT** Issue 1: AI-Generated Content Detected in Hero and Section Intros

Owner: 🔧 ✍️ Both

Section: Section 1: Hero + Organizational Hook

Screenshot Reference:

Hero section with organizational hook headline and introductory content

What's wrong: The hero and several section introductions contain copy that appears AI-generated and may not match the approved Content Architecture spec exactly. Aparna notes to be careful with AI-generated content throughout this page. All copy must be cross-referenced against the spec.

Fix: Audit all hero and section introduction copy against the For Organization_New spec. Replace any AI-generated filler with the approved spec content.

🔧 **Instruction for Niharika:** Cross-reference every text element on this page against the For Organization_New section of the Content Architecture doc. Flag and remove any copy not sourced from the spec.

📝 **Instruction for Paige:** Please review the full page for AI-generated content that slipped in. The spec is marked as ready for designer handoff, but the live implementation may have introduced unapproved copy.

🟡 **IMPORTANT** Issue 2: Learning Architecture Pillars: Verify Content Alignment

Owner: 🛠️ Niharika

Section: Section 2: Learning Architecture Design (Four Pillars)

Screenshot Reference:

Four Pillars section showing Knowledge Architecture, Intake & Triage, Analyst Engine, Dynamic Report Generator cards

What's wrong: The four pillar cards (Knowledge Architecture, Intake & Triage, Analyst Engine, Dynamic Report Generator) are present, which matches the spec. However, the content within each card needs to be verified word-for-word against the spec to ensure no AI-generated filler crept in.

Fix: Verify each pillar card's "What It Does" and "Organizational Benefit" text matches the spec table exactly.

🔧 **Instruction for Niharika:** Compare each of the four pillar cards against the spec's Section 2 table. Each card should have: Pillar name, What It Does, Organizational Benefit. Verify the callout box text: "It's how your organization thinks. Redesigned for AI-speed."

🟡 **IMPORTANT Issue 3: NCEMCH Partnership: Add Logo, Fix Table Visibility**

Owner: 🔧 Niharika

Section: Section 3: Embedded Training Partnership

Screenshot Reference:

NCEMCH partnership section with metrics table

What's wrong: The NCEMCH embedded training partnership section is present with a metrics table. However: (1) The NCEMCH logo should be placed for brand recognition, (2) The table is more visually dominant than the narrative content, creating an imbalance. The story should lead, with the table supporting.

Fix: Add NCEMCH logo. Adjust the visual weight between the narrative content and the metrics table so the story leads and the data supports.

Instruction for Niharika: (1) Source and place the NCEMCH logo in this section. (2) The metrics table is overpowering the narrative. Adjust font colors, sizes, or layout so the story text is more prominent and the table serves as supporting evidence. Consider reducing the table header visual weight or making the narrative body copy slightly larger.

🟡 **IMPORTANT** Issue 4: Stakeholder Voices: Fix Typography (Orphaned Words After Colons)

Owner: 🛠️ Niharika

Section: Section 3: Stakeholder Voices

Screenshot Reference:

Stakeholder quotes section with role titles

What's wrong: The stakeholder voice cards have titles where a single word sits orphaned after a colon (e.g., "Executive Director:" with the actual quote starting on the next line). This creates awkward visual breaks.

Fix: After colons in stakeholder titles, keep the first few words of the quote on the same line as the title. Never leave just a single word or role title alone on a line.

 **Instruction for Niharika:** Fix orphaned words in stakeholder cards. After a colon, the content should continue on the same line. For example, "Executive Director: Structured AI assistants moved me from..." should flow naturally, not break after the colon.

CRITICAL Issue 5: Page Is Very Text-Heavy: Needs Paige's Review for Conciseness

Owner:  Paige

Section: Full page

Screenshot Reference:

Full page scroll showing dense content throughout

What's wrong: The entire For Organizations page is extremely content-heavy. While the spec defines substantial content for each section, the live implementation feels overwhelming. Aparna specifically flags this: "lot of text heavy... we need to concise." This is the most content-dense page on the site and needs editorial review to trim without losing substance.

Fix: Paige should do an editorial pass to identify areas where copy can be tightened. Focus on the Embedded Training Partnership narrative, the What TBG Delivers section, and the Community Learning Pathways section.

 **Instruction for Paige:** This is the most text-heavy page on the site. Please review the full page and identify opportunities to:

1. Trim repetitive language
2. Combine redundant sections
3. Identify content that can be collapsed (accordions/toggles) vs. always-visible
4. Prioritize scanability: short paragraphs, bold anchors, bullet points

The page needs to feel authoritative but not overwhelming. Right now it reads more like a document than a webpage.

CRITICAL Issue 6: What TBG Delivers (Section 4): Tiered Offerings Structure Needs Paige's Input

Owner:  Paige

Section: Section 4: What TBG Delivers

Screenshot Reference:

Four Models section showing Strategic Discovery, Ongoing Architecture Partnership, Team AI Fluency, Embedded Transformation tiers

What's wrong: The tiered offerings (Strategic Discovery, Ongoing Architecture Partnership, Team AI Fluency Program, Embedded Transformation) are present on the page. However, Aparna notes this section's structure doesn't fully match the spec's design. The spec shows a 2x2 grid with Embedded Transformation as an expandable section with Foundation/Growth/Enterprise scales. The current implementation may be presenting these differently. Paige should verify the tier structure and confirm which elements should be expandable vs. always visible.

Fix: Paige to review the tier structure and confirm: (1) Are all four tiers correct? (2) Should Embedded Transformation sub-tiers (Foundation/Growth/Enterprise) be collapsed by default? (3) Does the "Choose Your Path" framing work?

 **Instruction for Paige:** Please review the "Four Models. Choose Your Path to Transformation" section. Confirm:

1. Are these four tiers still correct? Strategic Discovery, Ongoing Architecture Partnership, Team AI Fluency Program, Embedded Transformation (Foundation/Growth/Enterprise)
2. Should the Embedded Transformation sub-tiers be in an accordion/toggle?
3. Any content changes needed to the tier descriptions?

● **CRITICAL** Issue 7: Community Learning Pathways: Paige Needs to Specify Workshop Content and Calendar Integration

Owner: 🖋️ Paige

Section: Section 5: Community Learning Pathways

Screenshot Reference:

Community Learning Pathways section showing Lightning Lessons, Custom Team Workshops, Past Workshops tags

What's wrong: The Community Learning Pathways section has Lightning Lessons & Practice (left) and Custom Team Workshops (right) with past workshop engagement tags. The spec lists 7 past workshops that need objectives and images. Additionally, Paige needs to specify: (1) which specific workshop content goes where, (2) which calendar should be integrated for upcoming sessions, (3) the Maven COP session signup links.

Fix: Paige to provide workshop placement guidance, calendar integration details, and session links.

🔧 **Instruction for Niharika:** The workshop tags are present (Enterprise Tech Association Atlanta AI Week, Gwinnett Entrepreneur Center, ACE Speed Coaching, AI Ready Ohio, Municipal Agencies & Virtual Summits). Hold on placing detailed workshop content until Paige provides guidance on which content goes where.

🖋️ **Instruction for Paige:** Please provide:

1. Which workshop content goes in which card/position?
2. Which calendar should be integrated for "Browse upcoming sessions"? (Maven calendar?)

Google Calendar?)

3. COP session signup links for the two monthly sessions (2nd Tuesday and 4th Wednesday)
4. Lightning Lessons: any upcoming topics beyond the August 21 tax credits session?
5. Objectives and images for the 7 past workshops listed in the spec

🟡 **IMPORTANT** Issue 8: Consultation Modal: Verify It Connects to the Correct Scheduling System

Owner: 🛠️ Niharika

Section: Section 7: Next Steps / Schedule Consultation

Screenshot Reference:

Modal popup showing "Book a Discovery Call" with time slots, name, email, company fields

What's wrong: Clicking "SCHEDULE ORGANIZATIONAL CONSULTATION" opens a modal with a "Book a Discovery Call" form showing time slots, name, work email, and company/role fields. The modal header says "EXECUTIVE ADVISORY" which may not be the right label for organizational consultations. Also need to verify this connects to the correct scheduling system (should be organizational inquiry, not executive advisory).

Fix: Verify the consultation modal: (1) Change header from "EXECUTIVE ADVISORY" to "ORGANIZATIONAL CONSULTATION" or similar, (2) Confirm the scheduling backend is correct, (3) Verify the "Confirm Discovery Call" button actually books the call.

🛠️ **Instruction for Niharika:** (1) The modal header says "EXECUTIVE ADVISORY" but this is the For Organizations page. Change to "ORGANIZATIONAL CONSULTATION" or confirm with

Paige what the label should be. (2) Verify the scheduling integration works end-to-end. (3) Verify form submissions go to the right inbox/CRM.

🟡 **IMPORTANT** Issue 9: Measuring Organizational Impact

Section: Verify Table Content

Owner: 🛠️ Niharika

Section: Section 6: Measuring Organizational Impact

Screenshot Reference:

Measurement framework table showing four dimensions

What's wrong: The spec defines a four-dimension measurement table (Engagement & Adoption, Capability Growth, Workflow Impact, Organizational Outcomes). This section should be present with the exact table from the spec. Verify the content matches.

Fix: Cross-reference the measurement table against spec Section 6. Ensure all four dimensions, "What We're Tracking" and "Example Metrics" columns match exactly.

🛠️ **Instruction for Niharika:** Verify the measurement table has all four dimensions from the spec: (1) Engagement & Adoption, (2) Capability Growth, (3) Workflow Impact, (4) Organizational Outcomes. Each row should have "What We're Tracking" and "Example Metrics" matching the spec. The closing line should be: "The Goal: Move from awareness (Dimension 1) to proven business impact (Dimension 4). We measure all four. You track all four. Together."

Summary

Severity	Count	Issue Numbers
 Critical	3	#5 Text-heavy (Paige review), #6 Tier structure, #7 Workshop content
 Important	6	#1 AI content, #2 Pillars verify, #3 NCEMCH logo/table, #4 Orphaned words, #8 Modal label, #9 Measurement table

Action Items by Person

Niharika (Dev/Design)

1. Audit ALL copy against the For Organization_New spec. Remove any AI-generated filler.
2. Verify four pillar cards match spec word-for-word.
3. Add NCEMCH logo. Rebalance narrative vs. metrics table visual weight.
4. Fix orphaned words after colons in stakeholder cards.
5. Hold on detailed workshop content placement until Paige provides guidance.
6. Fix consultation modal: change "EXECUTIVE ADVISORY" header to "ORGANIZATIONAL CONSULTATION." Verify scheduling integration.
7. Verify measurement table matches spec Section 6 exactly.

Paige (Content Decisions)

1. EDITORIAL PASS: This is the most text-heavy page. Review for conciseness. Identify what can be trimmed, collapsed, or restructured for scanability.
2. TIER STRUCTURE: Confirm the four offering tiers are correct. Decide if Embedded Transformation sub-tiers should be in an accordion.
3. WORKSHOP CONTENT: Specify which workshop content goes where. Provide calendar integration details and session links.
4. WORKSHOP IMAGES: Provide images for the 7 past workshops.
5. COP SESSIONS: Provide signup links for the two monthly Community of Practice sessions.
6. LIGHTNING LESSONS: Any upcoming topics planned beyond the initial session?

Resources Page

Resources Page QA Feedback

Page: dev.thebradburygroup.net/resources

Reviewer: Aparna Mopuru (Operations Manager)

Date: September 15, 2026

Source: Screen recording walkthrough + Content Architecture doc (Section 6: Resources Hub)

<https://app.clickup.com/90131418838/hubs/clips/8ef2bb1e-c285-4f11-b23b-e9ca16acbd61.webm>

Overall note: This page was shipped without a self-review by Niharika. Basic QA issues (dev notes visible, layout problems, text wrapping) should have been caught before sharing.

OWNERSHIP LEGEND

 Niharika (Dev/Design fix)

 Paige (Content decision needed)

CRITICAL Issue 1: Developer "Mechanism Note" Is Visible to Users

Owner:  Niharika

Section: Top of page, below hero

Screenshot Reference:

Yellow info box visible on the page reading: "Mechanism note (for dev): Email capture form gates each download. Captured emails enter the Three-Gap Rotation nurture sequence (Desire/Ability/Context)."

What's wrong: A developer-only note is visible on the live page: "Mechanism note (for dev): Email capture form gates each download. Captured emails enter the Three-Gap Rotation nurture sequence (Desire/Ability/Context)." This is an internal implementation note from the Content Architecture doc that was accidentally rendered on the page. Visitors should never see this.

Fix: Delete this developer note immediately. It is an internal implementation instruction, not user-facing content.

 **Instruction for Niharika:** Remove the yellow "Mechanism note (for dev)" box from the page IMMEDIATELY. This is an internal dev note from the spec that should never be visible to site visitors. This is exactly the kind of basic QA issue that should be caught before sending pages for review.

CRITICAL Issue 2: "OUR ENGAGEMENT COMMITMENT" Section Shows Internal Mechanism Details

Owner:  Niharika

Section: Below the resources grid

Screenshot Reference:

Dark section showing "OUR ENGAGEMENT COMMITMENT" with Three-Gap Rotation details and a "Three-Gap Rotation Nurture Enabled" badge

What's wrong: Below the resource cards, there is a dark teal section titled "OUR ENGAGEMENT COMMITMENT" that says: "After you download, you'll hear from us with more resources like this. Useful frameworks, not sales pressure." It then describes the Three-Gap Rotation sequence (Desire, Ability, Context) and shows a "Three-Gap Rotation Nurture Enabled" badge.

While the transparency about email follow-ups is nice, the Three-Gap Rotation methodology details are INTERNAL marketing architecture. Showing the specific nurture sequence names and methodology to visitors breaks the fourth wall. The engagement commitment message is fine; the implementation details are not.

Fix: Keep the engagement commitment message but remove all references to "Three-Gap Rotation," "Desire/Ability/Context," and the "Three-Gap Rotation Nurture Enabled" badge. Simply say something like: "After you download, you'll hear from us with more resources like this. Useful frameworks, not sales pressure. Unsubscribe anytime in 1 click."

🔧 **Instruction for Niharika:** Remove: (1) The "Three-Gap Rotation Nurture Enabled" badge, (2) The sentence describing "clarifying Desire, building practical Ability, and engineering organizational Context," (3) Any reference to the nurture sequence methodology. Keep the basic promise: "After you download, you'll hear from us with more resources. Useful frameworks, not sales pressure. Zero spam, unsubscribe anytime in 1 click."

🟡 **IMPORTANT** Issue 3: Core4 Worksheet Is NOT "On Hold" — Content Has Been Updated

Owner: 🛠️ Niharika

Section: Resource cards / Core4 Worksheet item

Screenshot Reference:

Resources page showing resource cards with various statuses

What's wrong: The Core4 Worksheet resource may be showing an "on hold" or placeholder status. Aparna clarifies: the Core4 Worksheet content is NOT on hold. The content has been changed and was already placed in the spec. It should be active and available for download.

Fix: Update the Core4 Worksheet card to reflect that the content is ready. Remove any "on hold" or "coming soon" status. Use the updated content that was placed in the Content Architecture doc.

🛠️ **Instruction for Niharika:** The Core4 Worksheet content was already updated and placed in the spec. It is NOT on hold. Make sure the resource card reflects this: active status, correct description, and working download link.

🟡 **IMPORTANT** Issue 4: Glossary Should Link to Maven, Not Be Hosted on Resources Page

Owner: 🖋️ Paige

Section: Resource cards / Glossary item

Screenshot Reference:

Resources page resource list including Glossary entry

What's wrong: The Glossary resource is listed on the Resources page. However, the glossary should live on Maven, not be hosted directly on this page. The Resources page should link out to the Maven glossary rather than displaying glossary content directly.

Fix: Replace any on-page glossary content with a link to the Maven glossary. Paige to provide the correct Maven link.

 **Instruction for Paige:** Please provide the Maven link for the glossary. The Resources page should link to Maven for the glossary rather than hosting it directly.

🟡 **IMPORTANT Issue 5: Email Capture / Mailing List Plugin: How Will It Work?**

Owner:   Both

Section: Resource download mechanism

Screenshot Reference:

Resource cards with download buttons visible

What's wrong: The spec requires email capture gating each download: users provide their email before downloading any resource, and captured emails enter a nurture sequence. The current page shows "[Download PDF]" and "[Download Whitepaper]" buttons, but it's unclear if the email capture form is actually implemented behind these buttons.

Fix: Verify the email capture mechanism is working. When a user clicks a download button, they should be prompted for their email before the download is released. Confirm which email/form plugin is being used.

 **Instruction for Niharika:** Verify: When clicking any download button (PDF, Whitepaper, etc.), does an email capture form appear before the download? If not, implement the email gate. Check which plugin/service handles this (HubSpot form embed, custom modal, etc.).

 **Instruction for Paige:** How should the email capture work? Options: (1) HubSpot form modal before each download, (2) One-time email capture that unlocks all resources, (3) Inline form on the page. Please confirm the preferred mechanism.

CRITICAL Issue 6: Resource Cards: Too Much Whitespace, Should Be Compact Card Layout

Owner:  Niharika

Section: Resource cards grid

Screenshot Reference:

Resource card taking up full width with excessive whitespace around it when filtered by category

What's wrong: When clicking on a resource category filter (e.g., "Leadership & Case"), the filtered resource card takes up the entire width of the page with massive whitespace around it. The cards should be displayed as compact cards in a grid, not as full-width isolated blocks. This wastes screen space and increases unnecessary scrolling.

Additionally, when expanded, text within cards wraps awkwardly.

Fix: Redesign resource cards as a compact card grid (2-3 cards per row on desktop). Each card should be a fixed-size box with title, description, category tag, file size, and download button. Reduce whitespace between and around cards.

🔧 **Instruction for Niharika:** Fix the resource card layout: (1) Use a grid layout (2-3 cards per row on desktop, 1-2 on tablet, 1 on mobile), (2) Each card should be a compact, fixed-height box, (3) Remove the excessive whitespace that appears when filtering by category, (4) Fix any text wrapping issues within cards. The goal is to reduce scroll length and make the page feel organized, not sparse.

🟡 **IMPORTANT** Issue 7: Text Wrapping Issues in Resource Cards

Owner: 🛠️ Niharika

Section: Individual resource card content

Screenshot Reference:

Resource card showing text that wraps awkwardly

What's wrong: Text within resource cards wraps poorly. Titles and descriptions break at odd points, and the "Covers:" sections don't flow cleanly within the card boundaries.

Fix: Fix text wrapping within all resource cards. Ensure titles, descriptions, and "Covers:" sections display cleanly within card boundaries without orphaned words or awkward line breaks.

 **Instruction for Niharika:** Check every resource card for text wrapping issues. Titles should fit cleanly. Descriptions should not have orphaned single words on their own line. The "Covers:" info boxes should have consistent padding and text flow.

Summary

Severity	Count	Issue Numbers
 Critical	3	#1 Dev note visible, #2 Internal mechanism exposed, #6 Card layout/whitespace
 Important	4	#3 Core4 not on hold, #4 Glossary to Maven, #5 Email capture, #7 Text wrapping

Action Items by Person

Niharika (Dev/Design)

1. IMMEDIATELY delete the "Mechanism note (for dev)" yellow box from the live page.
2. Remove Three-Gap Rotation methodology details and badge from the engagement commitment section. Keep the user-friendly message only.
3. Update Core4 Worksheet to active status. Content is ready and was already placed in the spec.
4. Redesign resource cards as a compact grid (2-3 per row). Eliminate excessive whitespace.
5. Fix all text wrapping issues in resource cards.
6. Verify email capture form works behind download buttons.
7. PROCESS NOTE: Please self-review pages before sending for QA review. Basic issues like visible dev notes and broken layouts should be caught in your own review first.

Paige (Content Decisions)

1. Provide the Maven link for the Glossary. It should live on Maven, not be hosted on the Resources page.
2. Confirm the email capture mechanism preference: HubSpot modal, one-time unlock, or inline form?
